Vision

• A lively campus; a magnet for student, faculty, staff and public life;

• State of the art facilities to support the university’s mission for teaching, research and public life;

• A setting to foster interdisciplinary collaboration and interaction;

• Campus as a destination for the public;

• Functional and sustainable transportation;

• Capitalize on the natural landscape setting; and

• Leadership in environmental stewardship.
A lively campus; a magnet for student, faculty, staff and public life

- Compact campus centers to intensify student presence on campus.
- Create opportunities interdisciplinary research and collaboration.
- Develop a strong sense of entry and establish a distinct sense of place that is tied to the City and State.
- Provide adequate athletics, intramural, and recreational facilities.
State of the art facilities to support the university’s mission

• Address growth needs of the campus, especially the Health Sciences Campus.

• Establish guidelines for future development of the Golf Course and Research Park.

• Improve the quality of housing through renovation, replacement, and new construction.
A setting to foster interdisciplinary collaboration and interaction

• Foster the synergy between research and teaching with facilities that promote collaboration and interaction.

• Provide indoor and outdoor spaces for students to study and interact with each other.
Campus as a destination for the public

• Encourage the public to participate in a wide range of university activities, including the arts, athletics, recreation, and academic programs.

• Provide adequate facilities to support public activity, including parking and other services.

• Cooperate with the City and other local services to establish a vibrant and engaging campus experience.
Functional and sustainable transportation

• Improve walkability and universal access.

• Improve accessibility to transit and continue to promote alternative modes of transportation.

• Enhance and support bicycling.

• Improve the efficiency of shuttle bus systems.

• Clarify vehicular circulation network, especially at Health Science Campus.

• Establish a more efficient and effective parking strategy.

• Improve signage to promote safety and way-finding.
Capitalize on the natural landscape settings

- Create smart open space and promote the intelligent use of landscape.
- Enhance the open space framework and access to nature.
- Preserve significant views into, within and from the campus, including views to the Wasatch Mountains and Valley.
- Reduce the visual and physical impact of parking through landscape enhancements.
Leadership in environmental stewardship

- Integrate the principles of environmental sustainability into campus planning, design and operations.
- Promote the stewardship of campus lands and resources.
