

Effective for Bills Dated After  
**July 2024**

## University of Utah Rate Schedule for Water, Sewer, & Stormwater Service FY25

**Prepared By**

*Lissa Larson*

**Lissa Larson**  
 Associate Director, Sustainability &  
 Energy

**Approval**

*James R Russell*

**James R Russell**  
 Associate Vice President of Facilities

**Application**

This schedule is for water, sewer, and stormwater/street services for all buildings supplied through one of the University of Utah's central distribution systems (not having a commercial meter directly served and billed through an external utility company).

**Billing Rates**

<b>Water</b>	<b>\$3.759 CCF water</b>
Resource cost	87.9%
R&R cost	5.8%
O&M cost	6.3%
<b>Sewer</b>	<b>\$5.720/ CCF water</b>
Resource cost	97.6%
R&R cost	2.1%
O&M cost	0.3%
<b>Stormwater/street</b>	<b>\$0.0383/ ft<sup>2</sup> of floor area</b>
Resource cost	96.7%
R&R cost	0.0%
O&M cost	3.3%

**Rate Calculations**

Water and sewer rates are calculated annually by dividing the sum of the last calendar year's campus production costs (in U.S. dollars) by the sum of external water consumption (in hundreds of cubic feet [CCF]) over the same period. The stormwater/street rate is calculated by dividing the sum of stormwater/street costs (in U.S. dollars) by the total campus floor area of buildings and parking lots served by the central systems (in square feet).

Costs include the purchase of water, streetlight maintenance costs, and associated supplier fees, surcharges, and taxes. Production costs also include the University's labor and material costs of the previous calendar year for operation, maintenance, and metering of the water and sewer systems.

Renew and replace (R&R) is collected from Auxiliaries, to supplement state funding for the replacement of major assets necessary for the distribution of water and sewer. These assets

include pipe, pumps and meters. For FY25, R&R collection is based on planned and approved projects.

The city's taxes are split between the water, sewer, and stormwater/street billing rates by weighted average.

**Scheduled Rate Adjustments**

The rates above reflect an estimated 20% increase from SLC in rates. However, this does not include rate stabilization fees from SLC Department of Public Utilities, which will be in effect for FY25.

NOTE: University well water system does not contribute to water rates as it has no direct cost and is not piped for building use.

Where approved supplier rate changes have already taken place since the last calendar year (when costing information was totaled) or after scheduled to take effect during the period this rate schedule applies to, rates shall be adjusted proportionally by the same amount.

**Time Periods**

Rates do not vary by time of day, day of week, season, or holidays.

**Consumption Measurement and Calculation**

Where one or more commercial-grade building-level meters are present, consumption is directly measured. Where existing devices are unable to directly measure consumption for a group or area, values are calculated based on the measurements of the closest parent meter and the percentage of served floor area.

Readings typically occur once a month and are estimated during months when meters are inaccessible or awaiting repair.
